SUMMARY

Full-stack software engineer with 3+ years shipping production systems across fintech and consumer products. Comfortable across Go, Python (Django/FastAPI), and JavaScript/TypeScript, with React/Next.js on the frontend when a product needs both ends built end-to-end. Most recently built card issuance, KYC, and wallet infrastructure at Graph Finance.

SKILLS

Languages & Frameworks	Go (Gin) · Python (Django, FastAPI, Flask) · TypeScript/Javascript · React.js · Next.js
Databases & Infra	PostgreSQL · MySQL · MongoDB · Redis · RabbitMQ · AWS · Docker · Nomad
Tools & Practices	Git/GitHub · New Relic · Sentry · Postman · REST APIs · Event-driven architecture · CI/CD · Idempotency

EXPERIENCE

Software Engineer · Graph Finance Aug 2025 – Aug 2026

Developer-first financial infrastructure platform for payments, money movement, and multi-currency wallets across Africa.

- Built a card integration end-to-end — authentication, issuance (corporate + individual), re-issuance, funding, withdrawal, freeze/unfreeze/termination, and webhook processing — plus feature-flagged cashback crediting to the master wallet.
- Built an internal admin API to provision funding bank accounts with ACH, Wire, SWIFT, and IBAN routing support.
- Implemented a KYC verification state machine with enforced status transitions and an admin audit trail on approvals/rejections, plus compliance-gated freeze/unfreeze controls for organisation accounts.
- Extended webhook delivery with manual retry and an automated sweep job for failed events; built a liquidity alerting job with configurable Slack thresholds.

Stack: [Go](#) · [PostgreSQL](#) · [MongoDB](#) · [Redis](#) · [RabbitMQ](#) · [AWS](#) · [New Relic](#) · [Sentry](#)

Software Developer (Contract) · SpiCodeX Nov 2024 – Jan 2025

Bondyt — a social dating platform focused on user engagement.

- Engineered the date-booking system, increasing successful match confirmations by 45% and reducing scheduling conflicts.
- Implemented the reels and comments system for user-generated content, driving a 50% increase in daily active users.
- Built password reset and token verification endpoints, improving account recovery success by 40%.

Stack: [FastAPI](#) · [Python](#) · [Redis](#) · [PostgreSQL](#)

Backend Developer, Intern · HNG Jun 2024 – Sep 2024

- Built the thumbnail-generation feature for Tifi, an AI video suite, using FFmpeg — cutting manual processing time by 80%.
- Developed a real-time analytics dashboard API on the HNG boilerplate platform, serving 500+ active users.

Stack: [FastAPI](#) · [ffmpeg](#) · [Celery](#) · [RabbitMQ](#) · [PostgreSQL](#)

Frontend Developer · FarstCart Jul 2023 – May 2024

- Delivered a responsive MVP with Next.js and Tailwind CSS, increasing engagement by 50%.
- Collaborated with an international team of designers and developers on the digital shopping experience.

Stack: [Next.js](#) · [TypeScript](#) · [Tailwind CSS](#) · [Redux](#)

Software Developer · Co.Lab Mar 2023 – May 2023

- Shipped Wabisabi's MVP within 3 months across 10 sprint milestones, cutting navigation time by 20% and raising satisfaction by 15%; built 20+ features for Festa, an EDM event aggregator, decreasing mobile load time by 30%.

Stack: [React.js](#) · [Tailwind CSS](#)

PROJECT

BookStack · Personal, Full-Stack May 2025

- Book recommendation app curating personalized reading suggestions; built the React/Tailwind frontend and the Django/PostgreSQL API end-to-end.
